

AUTOAGENT

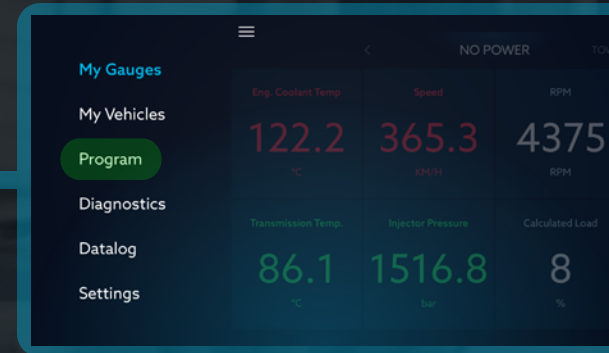

Installing an ECU Profile to a vehicle.

Launch the EZ LYNK AutoAgent application.

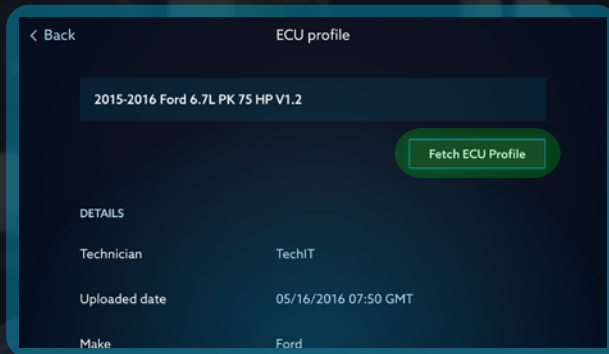

Enter the Main Menu by touching the icon at the top left of the display.

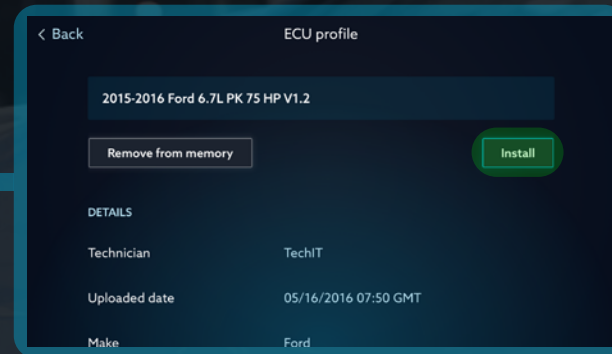

Select "Program" from the Main Menu.

Select the ECU Profile that you'd like to install.

Select "Fetch ECU Profile".

Select "Install".

Wait for the ECU Profile to be transferred.

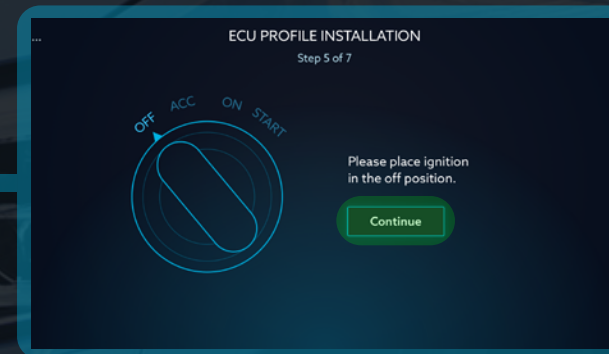

Place the ignition in the OFF position.

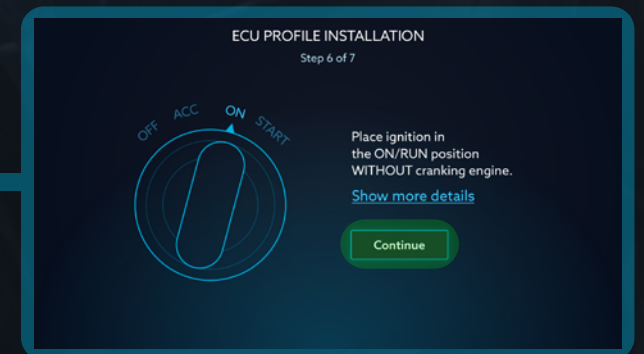

Place the ignition in the ON/RUN position WITHOUT cranking the engine.

Allow the ECU Profile Installation to complete.

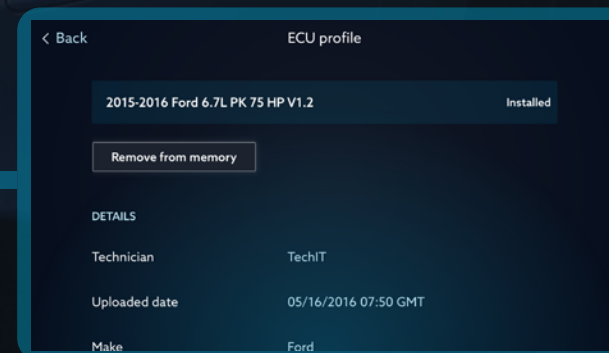

Place the ignition in the OFF position.

Place the ignition in the ON/RUN position WITHOUT cranking the engine.

Select "Let's go!" to complete the Installation.

The ECU Profile will now show as Installed.
