

advanced FLOW engineering®

P.O. Box 1719 Corona, CA 92879 Support: 951-493-7100 www.aFepower.com

Part Number: 46-10011

Make: Dodge

Model: Ram 2500/3500

Year: '03 - '07

Engine: L6-5.9L (td)

Pai

- Parts list:
- 1 Manifold, Charged Air
- 2 Screws, socket cap M8 x 1.25 x 160 2 Screws, socket cap M8 x 1.25 x 100

BladeRunner® Charged Air Manifold Installation Instructions: 2003-2007 Dodge Ram Cummins L6-5.9L (td)

- 3 Screws, socket cap M6 x 1 x 8
- 2 Gasket, manifold
- 4 Washer, flat M8
- 1 Washer, fender M6
- 2 Plug, 3/8" NPT 2 Plug, 1/8" NPT

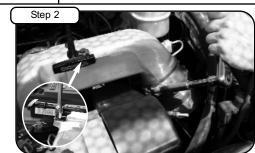

- 1 Bracket
- 1 Tool 6mm, hexagonal bit
- 1 Threadlocker, blue

Complete Kit w/ Parts

Stock Intake Manifold.

Tools Required:

6mm socket

8mm allen kev

5mm allen key

3/16" allen kev

Torque wrench

11mm socket or wrench

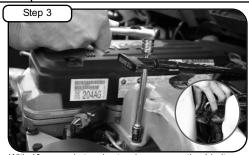

10mm socket or wrench

6mm hexagonal bit (provided)

Gasket remover (scraper)

Ratchet w/ extension

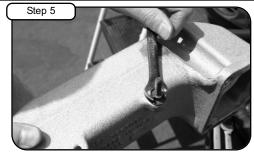

With a 11mm socket with ratchet, loosen the intercooler coupler hose clamp. With 10mm socket, remove the bolt holding engine oil dipstick.

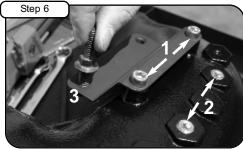

With 10mm socket and extension, remove the 4 bolts holding the stock manifold. Remove the engine wiring harness connections in back of stock manifold. Pull harness bracket off mounting stud.

Carefully remove stock manifold out of vehicle. (Place a clean shop rag over air grid heater to prevent anything from entering)

With 10mm wrench, remove the engine wire harness bolt from the back of the stock manifold. Place to the side for later install

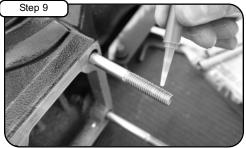

1) Install bracket w/ M6 socket cap screws provided. Torque using 5mm allen key. 2) Install 1/8" NPT plugs to aFe manifold using 3/16" allen key. 3) Install engine wire harness bolt to from step 5 to bracket. (See notes 1, 2 & 3)

Insert the 2 shorter M8 socket cap screws through aFe manifold. Hold washer against inside mounting flange of aFe manifold and feed screw completely through. Insert the two longer M8 screws w/ washers through the outside mounting bosses.

Remove both top and bottom stock gaskets away from air grid heater. Replace with new gaskets provided. (May require a scraper or scotch brite to clean sealing surfaces.)

Apply threadlocker to the four mounting bolts.

Carefully install aFe manifold into vehicle. Guide bolts through gaskets and air grid heater. Insert aFe manifold into intercooler coupler hose.

With 6mm hexagonal bit provided and 6mm socket, install the four mounting bolts. Do not tighten completey!

Tighten coupler hose clamp with 11mm socket (See notes 2 & 4). Tighten the four mounting bolts from Step 11 (See notes 2 & 5).

Install the two 3/8" NPT plugs to top of aFe manifold. Tighten using 8mm allen key (See notes 1, 2 & 5).

Install the engine oil dipstick using M6 fender washer and socket cap screw provided. Tighten using 5mm allen key (See notes 1, 2 & 3). Attach the engine wire harness to the aFe manifold.

Your installation is now complete. Please check all bolts and screws perodically. Re-tighten if necessary. Thank you for choosing aFe!
