2015 - 2020 Ford F150 40/20/40 Bench Seat - Arm Rest Vault Installation Instructions

800-878-1369 www.consolevault.com

IMPORTANT. Please write down your “Key-Code” number and store in a safe place. This number will be needed to order replacement or extra keys. **DO NOT STORE INSIDE THE VAULT.**

Fig. 1

Fig. 2

- 1) Remove all your contents from the Arm Rest storage compartment including the factory felt pad (see figure 1). Take your Console Vault and slip it down into the compartment. Make sure you gently push the Vault down so it sits firmly down into this compartment. Open the lid of your Console Vault and notice the two (one on each side) threaded fittings located towards the front and top of the vault.
- 2) Now take the two self cutting screws that came with the kit and thread each screw into these fittings. Now using a socket or wrench start turning these screws (see figure 2). These screws are designed to cut their own hole as they turn. For best results you will want to alternate turning these screws. Give each one a couple of turns then repeat on each screw until they are fully into the fitting.
**VERY IMPORTANT!!!! NO NOT OVER TIGHTEN THESE SCREWS,
ONCE THE SCREW IS FULLY DOWN STOP. OVER TIGHTENING WILL CAUSE DAMAGE TO THE FITTING.**
- 3) Next put the liner in the bottom of the console and the installation is complete.
